PVC Compounds

Made in **Türkiye**

Who we are

Keremplast®

Established in Istanbul in 2006, Keremplast® has transformed its solution-oriented process management into a business model that works with 100% efficiency. Stabilizing customer satisfaction at the center of its business model, Keremplast® has a fully equipped facility to meet high volume orders.

Keremplast® subjects PVC granules to various control tests thanks to the KP-LAB (Keremplast Laboratory) it has established in order to ensure consistency in quality. The most efficient PVC granules with the required specifications are analyzed within the scope of KP-LAB and developed with the most accurate formulas.

In accordance with the principles of consistency in trust, partnership and quality, Keremplast® manufactures the most efficient granules with the most advanced technologies and presents them to its customers, each with an expert team.

KP-LAB

Laboratory

We at KP-LAB test the suitability of PVC granules with sectoral requirements for extrusion and injection.

- **Density**
- **Hardness (Shore A and D)**
- **Break**
- **Elongation**
- **Moisture holding**
- **The loss of mass**
- **Oxygen index (LOI)**
- **Thermal stability**
- **Fluidity**
- **Ageing**

Usage Area of

PVC Compounds.

- 👉 **Cables**
- 👉 **PE Beddings Compounds**
- 👉 **HFFR Bedding Compounds**
- 👉 **Profiles**
- 👉 **Gaskets**
- 👉 **Automotive Sector**
- 👉 **Pipes**
- 👉 **Fittings & Connections**
- 👉 **Soles**
- 👉 **Panels**
- 👉 **Hoses**
- 👉 **Medical Grade**
- 👉 **Toys**
- 👉 **Stretch Films**

Why **Keremplast®** ?

Make your business grow continuously, by processing consistent quality PVC compounds.

We manufacture the highest quality PVC compounds to optimise your production efficiency.
